DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a method of assembling a joint, classified in class 29.
 - II. Claims 11-18, drawn to fastener, classified in class 411.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the method can be practiced with a fastener not having all structural limitations of the product claims.
3. It's further noted that a single claim for a product and process of using is indefinite and potentially non-statutory. See MPEP 2173.05(p) [R-5]. While it's not clear that is the case (prior to a fuller examination), it's noted that claim dependency between the claim groups is atypical. Applicant's remarks addressing this issue are solicited as part of a Complete Response.
